To and From should both be included in the second box down.
From should be aligned to the far right.

To and **From** have been moved to the second box down across the web UI, the 144 DPI side-by-side PNG generators, and the printable PDF layout, with **From** aligned to the far right.

Layout Hierarchy

1. **Box 1 (First Box Down Subject & Metadata)**:
    - **Left**: Subject title (e.g. `12pt / 26px bold`).
    - **Right**: Date of receipt / revelation and status badges.
    - *(The `From:` label has been removed from this top box).*
2. **Box 2 (Second Box Down To / From Bar)**:
    - Formatted as a distinct bordered horizontal bar directly below the Subject box.
    - **Left**: `To: <recipient / destination address>`
    - **Far Right (`margin-left: auto; text-align: right;`)**: `From: <sender address / site host>`
3. **Box 3 (Third Box Down Body Content)**:
    - The message body formatted in 12pt monospace typography with 18pt line pitch.

Applied Across All Output Formats

- **Web Message Cards (Inbox, Client, Revealed, Group, Archive)**:
    - Added `.message-party-bar` directly beneath `.message-card-header`, with `.message-to-text` on the left and `.message-from-text` aligned far right.
- **Individual Letter Printable PNG (`downloadMessageAsPng`)**:
    - The second box down on Page 1 renders `To:` at the left margin and `From:` aligned to the far right border edge.
- **Archive Page Side-by-Side PNG (`exportArchivePageAsPng`)**:
    - For each non-omitted letter, Box 2 renders `To:` on the left and `From:` on the far right.
    - Omitted letters remain clean empty framed boxes with no subject, To, or From.
- **Print / PDF (`printSingleMessage` & `@media print`)**:
    - Printable letters format `.letter-box-2` as a flexbox bar with `To:` on the left and `From:` aligned far right for standard 8.5″ × 11″ PDF output.
